2. [redacted] demanded stricter democratization of the railroads. There are too many Nazis, the workers are too conservative, political training is insufficient, administrative methods are antiquated, there is too little initiative, plant councillors do not know their jobs, trade unions are not active enough. [redacted] asked the SED for suggestions.

3. [redacted] proposed the formation of transportation committees in the Central Secretariat and in Bezirk and Kreis SED organizations to consist of the local trade union leader (if he is a reliable SED member) and representatives of SED groups in the railroad directorates. These committees are to provide:

- a) Ideological control of workers,
- b) Political education of workers,
- c) Political education of plant councillors,
- d) Democratization of administration by removing Nazis and militarists and calling on all officials for public accounting to the workers.

[ ] said that the SED viewpoint on denazification is stated in the papers and that the SED adheres to this statement in regard to railroads, also.
